White Paper

Business Blueprint or Enterprise Blueprint

Prepared by Dr. David Addie Noye,

December 19, 2008

The problems or challenges facing potential entrepreneurs or start ups

There is high degree of uncertainty and risk in starting and running manufacturing or service business enterprise. How to start a business is a nerve-racking or scary task for those not equipped or prepared with the training, experience and tools it takes to succeed. Prospective entrepreneurs therefore face several problems or questions when considering starting a business, especially a manufacturing enterprise.

These include I'm at a crossroads in my career, and now is the time but how do I get started? I don't even know how to compile a budget to know if it is feasible. I can't understand or figure out all the variables such as product selection, equipment needs, building size, building permits, clearances, legal, construction, insurance, etc. How can my product or service meet quality requirements and industry standards? Where do I market my product or service and who are my customers? I have several product ideas but I don't know which one to pick or where to start from? I am not sure whether any of these business ideas will be profitable or successful? Additionally, potential business men and women are concerned with ways to better track inventory, customers, invoices, sales, expenses, managing vendors and customers.

To find answers to all these multiple questions and challenges will eat into your time and keep you from focusing on what you want to do best, running your business. There must be a better way to stay organized, free up more time to build, grow and expand your business. Is there a good resource that will provide an outline or blueprint that may be helpful?

Our Answer or Solution to the Problems or Challenges - Business Blueprint or Enterprise Blue Print for Starting a New Manufacturing or Service Business Enterprise

We exist to provide complete enterprise solutions or business solutions combined with innovative technology solutions that remove these uncertainties and risks by marketing and installing complete enterprise blueprints or business blue prints for starting manufacturing and/or service businesses in specific industries. These enable our clients to readily start and/or grow a business by

hitting the ground running as soon as they purchase our turnkey package and license our business/enterprise blueprints.

Our business or enterprise blueprints or architecture are sensitive information and detailed documentation of business enterprise requirements specifically defined for organizing and running a successful manufacturing or service company. These business or enterprise blueprints are a detailed description of business processes and system requirements. These blueprints detail out the common business processes within a scope of a specific project and serve as a reference for other people to get onto the implementation of the project on time.

The business or enterprise blueprints cover pre-designed products/service; pre-designed methods for manufacturing the products or providing the services; pre-selected method of tracking inventory; pre-selected equipment and tools for processing or producing the products or providing the service; pre-determined high value customers, and pre-determined strategy for marketing or distributing the products/services to target buyers among others.

Our turnkey packages also cover equipment supply, installation, training and commissioning. Additionally, we provide long term after sales service support including life time spare parts supply and preventive maintenance support. We therefore license our turnkey package or blueprint to our clients and take responsibility for success or failure for adopting our innovative manufacturing and technology systems. However, we not responsible for failures due to accounting problems, financing problems, operator deficiencies, personnel problems, recruitment problems, management problems, buyer behaviors and other risks and uncertainties and external factors which are not directly related to our turnkey systems.

Benefits for Adopting or Licensing our Business or Enterprise Blue Print
