- Curry Prawn processing line
- French fries/Fresh potato chips processing line
- Fried Pasta and Macaroni Machinery
- Artificial/nutritious/health rice processing line
- Pringles/Lay's Processing Line
- Fish & shrimp food processing lines
- Pet food processing lines

We create opportunities for new high paying jobs, economic developments and poverty alleviation in poor, distressed, underserved, and economically disadvantaged communities.

Technologies for starting and growing business enterprises

We research, design, add value and sell intellectual properties/assets for starting and growing profitable business enterprises. For more information visit us at www.technologisolutions.com or call 1-888-434-3222 or 404-644-1458 or email to info@technologisolutions.com or danoye@gmail.com

TECHNOLOGI
SOLUTIONS
RESEARCH™

Mission Statement

Our mission is to provide technology and industrial solutions and strategic advice to accelerate job creation and improve income generating opportunities consistent with the needs of local communities in the United States and abroad. Our services are specifically targeted at local communities or markets that are interested in mitigating or preventing economic downturn. .

Value Proposition:

We provide one-stop-worry free turnkey enterprise blue print solution for starting and growing profitable manufacturing/service enterprises to create new entrepreneurs, create new institutions, create new industries, modernize dwindling industries, and increase incomes.

Our Business Model—

Obligations to Our Clients

Our clients benefit from proven business model, marketable product or service, established markets, established buyers, established raw material suppliers, reliable equipment suppliers, proven process designs, available process or assembling technologies/techniques or secret formula, factory size, installation support, training of operators, facility designs, project management, management systems, quality systems, inventory management system, after sales service support, continuous quality improvement, technical assistance to raise funds to establish business at location of your choice, and national and international ad campaigns.

Our Business Model—Our Client's Rights and Responsibilities

Client provides capital investment for the entire project and owns the enterprise. Client therefore pays or leases own facilities, buys own inventory, and pays for operating expenses. Client may opt to purchase or lease a license to copy or practice our advanced business/enterprise model. Consequently, client uses the our business name, trade mark, technical know-how, facility designs, manufacturing management systems, quality assurance system, inventory management system, support for established buyers and suppliers. Therefore, after enterprise is established client pays royalties or fees as a percentage of the revenue based on type of manufacturing or service business enterprise during the operational phase. Client also benefits from other after sales services support such as national and international ad campaigns, continuous quality improvement and R&D undertaken at the top corporate level.
